

Roxanne™ Thimbles

The functional, pretty thimble for state-of-the-art handquilting

* American made to last a lifetime, these thimbles are virtually impenetrable by needles. Each thimble is dye-cast by hand, using bronze or solid sterling silver. For people with metal allergies, we offer a polished bronze model, otherwise the bronze thimbles are then plated with sterling silver or 14k gold.

* Orthopedically designed to fit like an armored glove around the quilter's fingertip, the roundness at the pad of the finger allows the quilter to use his/her finger in accordance with its musculoskeletal structure. Perfect for quilters who are concerned about developing joint problems or who want to avoid aggravating a preexisting condition.

* Sixteen different sizes in four metals assure each quilter of a uniquely personal and snug fit. The Roxanne™ Thimble, when properly fitted, does not fall off, slip or turn on the finger, allowing the quilter to concentrate on what is truly important: THE STITCH.

* The open face design is critical for a 'glove-like' fit and allows for evaporation. The state-of-the-art design also aids in preventing oil buildup, thus hindering the growth of fungus and preserving the life of the thimble. As an added bonus, quilters who choose to have long fingernails can finally do so without sacrificing their quilting stitch!

* The computer designed dimples are placed all around the pad, high and low, so that anyone can make use of this invention. Whether left-handed, right-handed, quilter, applicuer or tailor, the Roxanne™ Thimble is right for you! The dimples are exactly the correct depth to control the needle without the help of other fingers. Each dimple is concave in order to allow the needle to pivot but not snap. The Roxanne™ Thimble is guaranteed to be puncture-proof for a lifetime.

* The solid sterling silver model is truly of heirloom quality. The unique feel of the metal is incomparable, not to mention its ability to expand and contract with outside temperatures. Perfect for fibreartists with allergies or those who need a thimble that can meet with rigorous demands. The dimples are slightly deeper in this model.

* The Roxanne™ Thimble is aesthetically pleasing with the Tahitian Hibiscus flower at the base of the nail, but don't let its beauty fool you. This is definitely the most functional and comfortable thimble available today!
